Mako Offshore

The RCV155 is a high-performance hydraulic wire rope cutter engineered by Webtool (Allspeeds UK). Built for deep-sea and topside operations, it offers powerful, reliable cutting performance in harsh marine environments. With a large cutting capacity and minimal maintenance requirements, it is ideal for both planned production cutting and emergency subsea deployment via ROV.

Key Features

- Versatile – For subsea or topside cutting
- Powerful – Cuts up to 155 mm wire rope
- Reliable – Proven Webtool performance
- Durable – Withstands harsh environments
- Fast – ROV-friendly hydraulic operation
- Low Maintenance – Long blade life, reduced downtime
- Made in the UK

Technical Specifications

Specification	Value
Maximum Cutting Diameter	Ø155 mm
Max Hydraulic Input Pressure	690 bar
Weight In Air	241 kg
Weight In Water	208 kg
Cut Stroke Swept Volume	3.7 litres
Return Stroke Swept Volume	1.6 litres
